Ceremony to mark World Environment Day 2023 Held

A ceremony to mark the World Environment Day 2023 was held at the Myanmar International Convention Centre-II in Nay Pyi Taw on 5th June which was attended by the Chairman of the State Administration Council (SAC) Prime Minister Senior General Min Aung Hlaing. During the ceremony, the Senior General said as follows:

- The 5th June was designated as the World Environment Day at UN General Conference held in 1972 to solve the environmental problems collectively by all countries including Myanmar.
- This year's theme is **"Solutions to Plastic Pollution"**.
- The purposes of this year's theme is that all countries need to solve sub-sequent problems of plastic pollution caused by global human action and to accelerate the work of solving the plastic pollution problem, and to initiate a circular economy which can minimize the environmental impacts and volume of waste.
- Plastic is one of the environmentally harmful materials that does not decompose and that is so persistent. It takes a many years for the plastics to disappear.
- If plastic waste is incinerated, it will release poisonous gases such as carbon monoxide, dioxin, and hydrogen cyanide that will contaminate the atmosphere and will be severe harmful to health.
- Plastics cause pollution in the atmosphere, ground and water of the natural environment and pose danger to animals from both land and water areas throughout the period starting from the manufacturing process to the disposing one.
- According to **"The State of World Fisheries and Aquaculture 2022"** released by the Food and Agriculture Organization-FAO, it mentioned that the volume of water creatures and water resources declined due to extreme capturing of water creatures, water pollution, weak management and other causes.
- Plastic waste from discarded, lost and unused fishing nets in the oceans be-
